Web Resources for School Library

Introduction:

Due to the knowledge explosion and the advancement of information communication technology, the concept of libraries is shifted from traditional to digital. Presently. We are living in digital environment. Application of computer and communication methods online access to e-book, e-journals, e-knowledge banks, PDF document teletext, teleconference, bulletin boards, etc, have been the revolutionary development in the last few decades that have brought a great changes in storing and handling of information libraries are, today termed as digital libraries and hybrid libraries.

The role of the LIS professional is absolutely crucial in the new digital environment were there are great quantities of information but finding the quality in the huge haystack is a difficult task. To manage the digital library effectively the information manager should have the knowledge in the field of computer and networking, content manager and information analysis,

internet surfing technique, digital resources, websites and organization of data etc.

We are living in the age of information explosion and information communication technology revolution leading to the emergence of ITC and knowledge era. Use of ICT for information process. Storage and communication technology has revolutionized the role of worldwide libraries in disseminating information services to their users. As. A role of worldwide libraries in disseminating information services in disseminating information services to their users. As a result libraries are facing new challenges users are no longer satisfied with old printed materials. Users want information delivery in digital form without any time consuming.

Conclusion:

The recent development of information communication technology is playing an important role in restructuring of the libraries. Transfer from human dependent operation to machine dependency. In this recent development of ICT We have seen radical changes in information field especially in relation to collection. Storing. Processing and transmitting of information. LIS professional in the digital era will become the guardian of digital information and will be the vehicle to preserve democratic access to information.
