Directions (71-80): Read the following passage carefully and answer the questions given below them. Certain words/phrases have been printed in bold to help you locate them while answering some of the questions.

Despite the economic crunch worldwide that saw **pulverization** of some of the largest banking and

finance giants, Indian banking houses have managed to show positive growth this quarter. Some of India's leading national banks have posted a net profit rise of more than 40% over the last quarter amid global turmoil. This would come as a big shot in the arm for the investors and consumers of these bank even though apprehension is mounting on other banking and broking firms worldwide. One of the main reasons behind the success of these banks this quarter would be their direct backing by the Government of India. People take solace in their investments in public sector watching the bailout packages being cashed out by governments all over the world to save big business houses. Other private banks in India have also reported a substantial net profit over the last quarter. Given the international and domestic scenario, one cannot put this down as a **mundane** achievement. While others are on a cost-cutting spree and firing employees, Indian companies are actually working on boosting staffing banking and broking sectors. This can be seen as a big boon in the days to come when the current recessions ease and the economy gradually comes back on the fast track. The finance minister has assured Indian public about the sound health of the Indian banks. This could also be evident from the fact that there have been no mergers and takeovers in Indian banking sector in a contrast to world scenario where finance houses are looking for mergers to cut costs on operations. We definitely are not looking to thrive; rather we are looking for growth. It is just that the pace of growth is a little slow now as compared to a year or two before. These are hard times to test the hard. The weak in business and career will be weeded out and it is sometimes very beneficial for business in the long run.

Q71. What, according to the author, is the reason for the success of Indian national banks in this quarter?

- (a) Indian national banks do not have any commitments in troubled foreign markets.
- (b) These banks can never financial crisis because of their sheer size.
- (c) These banks are ready to give loans at a very low rate of interest
- (d) The public is ready to invest in these banks because of the knowledge that these banks get strong support from the Government.
- (e) None of these

Q72. What does the phrase 'shot in the arm' as used in the passage mean?

- (a) Shock
- (b) Fear
- (c) Encouragement
- (d) Anxiety
- (e) None of these

Q73. How, according to the author, is the current recession beneficial?

- (a) Worldwide companies have realized that India is a strong power to reckon with.
- (b) India is surging ahead of the other companies throughout the world.
- (c) After the recession is over international companies will turn to India for investment.
- (d) Recession is bringing down the prices of essential commodities.
- (e) None of these

Q74. What, according to the author, will be a big boon in the days to come?

- (a) The economy coming back on the fast track
- (b) The slowing down of the economy
- (c) Increased hiring in Indian financial sector in times of economic slowdown
- (d) The cost cutting carried out by all the companies
- (e) None of these

Q75. Which of the following statements is/are definitely true in the context of the passage?
