# BASIC B.Sc.(NURSING) – 1<sup>st</sup> SEMESTER EXAMINATION; JANUARY - 2018 (SUB:- ANATOMY & PHYSIOLOGY; PAPER CODE:-04100101)

a Condi	your Roll No. on the Question Paper. dates should ensure that they have been provided with correct question paper. Comp	laints in this regard,						
	should be made within 15 minutes of the commencement of the exam. No c	omplaint(s) with be						
2 Óuast	ained thereafter. ion paper consists of two parts (Part-I and Part-II). Max. Marks for Part-I are 37 m	narks and Part-II are						
38 m	38 marks Use separate answer book for each part. Any mistake in this regard shall be at the risk and							
respo	nsibility of the examinee and no complaint in this regard will be entertained after the	exam.						
4. Draw	the diagram wherever required.							
	PART-I (ANATOMY)							
ESSAY T	YPE QUESTIONS:-							
	lain in detail the structure of eye with suitable diagram.	(10)						
<b>C</b>	OR							
Exp	lain in detail the structure of blood with suitable diagram.	(10)						
<b>O.2.</b> Wri	te a short note on Any Three of the following:-	(3x5=15)						
a)	Neuron							
b)	Muscle							
c)	Nephron							
d)	Pancreas							
e)	Middle Ear							
O 3. Def	ine Any Four of the following terms:-	(4x2=8)						
a)	Immunity							
u) b)	Lymph nodes							
c)	Sebaceous glands							
d)	Osteoclasts	3						
e)	Alveoli							
	ferentiate between Any Two of the following:-	(2x2=4)						
<b>Q.4.</b> DII a)	Skeletal & Smooth muscles							
a) b)	Sympathetic & Parasympathetic Nervous System							
,	Granulocytes & Agranulocytes							
c)	Granulocytes & Agrandiocytes							
	PART-II (PHYSIOLOGY)	(3x5=15)						
Q.1. Wi	ite short notes on the following:-	(333-13)						
a)	Active transport							
b)	Neuromuscular junction							
c)	Hormonal regulation of serum calcium							
		P.T.O						

Single Response Questions:-	(1x10=10)
<ul><li>Q.1. The term 'homeostasis' was coined by:-</li><li>a) Claude Bernard b) William Harvey</li></ul>	c) Homer Smith d) Walter B Canon
<ul> <li>Q.2. The normal value of GFR is:-</li> <li>a) 40 mL/min</li> <li>b) 80 ml/min</li> </ul>	c) 125 mL/min d) 200 mL/min
<ul> <li>Q.3. The hormone that is responsible for intrautering</li> <li>a) Testosterone</li> <li>c) Mullerian regression factor</li> </ul>	<ul> <li>e development of make external genitalia:-</li> <li>b) Dihydrotestosterone</li> <li>d) Parathyroid hormone</li> </ul>
<ul> <li>Q.4. CO<sub>2</sub> is chiefly transported in blood:-</li> <li>a) as bicarbonate</li> <li>c) as carboxyhemoglobin</li> </ul>	<ul><li>b) bound to hemoglobin</li><li>d) in combination with plasma proteins</li></ul>
<ul><li>Q.5. The maximum amount of gas that can be exhated a) Tidal volume</li><li>c) Vital capacity</li></ul>	d) Expiratory reserve volume
<ul> <li>Q.6. Iodine is concentrated in thyroid follicular ep</li> <li>a) Primary active transport</li> <li>c) Simple diffusion</li> </ul>	<ul> <li>ithelial cells by:-</li> <li>b) secondary active transport</li> <li>d) Facilitated diffusion</li> </ul>
<ul><li>Q.7. Hormone secreted by anterior pituitary gland</li><li>a) Epinephrine</li><li>b) Oxytocin</li></ul>	c) Thyroxin d) Growth hormone
<ul> <li>Q.8. Insulin is secreted by:-</li> <li>a) α cells of pancreas</li> <li>c) δ cells</li> </ul>	<ul><li>b) β cells of pancreas</li><li>d) PP cells</li></ul>
<ul><li>Q.9. Thick fiber of skeletal muscle consist of:-</li><li>a) myosin</li><li>b) actin</li></ul>	c) troponin d) tropomyosin
<ul> <li>Q.10. Pacemaker in human heart is:-</li> <li>a) Sinoatrial node</li> <li>c) sinus-venosus</li> </ul>	<ul> <li>b) Atrioventricular node</li> <li>d) bundle of his</li> </ul>
<ul> <li>TRUE/FALSE:-</li> <li>Q.11. The pH of Pancreatic juice is acidic:-</li> <li>a) True</li> <li>b) False</li> </ul>	(1x5=5)
<ul><li>Q.12. Cell membrane contain lipid bilayer:-</li><li>a) True</li><li>b) False</li></ul>	
<ul><li>Q.13. Human heart have four chambers:-</li><li>a) True</li><li>b) False</li></ul>	

a)	True	b)	False					
Q.15. Er	ythropoietin is s	ecrete	ed from kidney:-					
ʻa)	True	b)	False					
SEQUEN	CING TYPE (	QUES	STIONS:-					(1x
Q.16. Ai	range the follow	ing in	n a sequence:-					
i)	Arrival of actio	n pote	ential at nerve terminal	l				
ii)	Release of acet	ylcho	line via exocytosis					
			ated calcium channel					
iv)	Opening of ligation	nd ga	ted cation channels					
a)	i, ii, iii, iv	b)	ii, i, iii, iv	c)	iv, iii, i, ii	d)	i, iii, ii, iv	
Q.17. Ar	range the follow	/ing ii	n a sequence:-					
i)	Spermatogonia			ii)	Spermatocyte			
· iii)	Spermatid			iv)	Spermatozoa			
a)	i, ii, iii, iv	b)	ii, i, iii, iv	c)	iii, iv, i, ii	d)	i, ii, iv, iii	
Q.18. CS	F passes throug	h <b>:-</b>						
i)	Foramina of mo	onro		ii)	Lateral ventricle			
iii)	Third ventricle			iv)	Aqueduct of sylvin	us		
v)	Fourth ventricle	•

## BASIC B.Sc. (NURSING) - 1<sup>st</sup> SEMESTER EXAMINATION; JANUARY - 2018 (SUB:- NUTRITION & BIOCHEMISTRY; PAPER CODE:-4100102)

## Max Marks:75

## TIME: 03:00 Hrs.

Instructions:-

- 1. Write your Roll No. on the Question Paper.
- Candidates should ensure that they have been provided with correct question paper. Complaints in this regard, if any should be made within 15 minutes of the commencement of the exam. No complaint(s) will be 2. entertained thereafter.
- 3. Question paper consists of two parts (Part-I and Part-II). Max. Marks for Part-I are 45 marks and Part-II are 30 marks. Use separate answer book for each part. Any mistake in this regard shall be at the risk and responsibility of the examinee and no complaint in this regard will be entertained after the exam.
- Draw the diagram wherever required. 4.

## PART-I (NUTRITION)

## PART-A (DESCRIPTIVE TYPE QUESTIONS)

## LONG ESSAY TYPE QUESTIONS:-

- Q.1. Define the term nutrition. Enlist the factors that affect food and nutrition. Discuss the importance of (2+3+5=10)nutrition and dietetics in nursing. (2X5=10)Q.2. SHORT NOTES (ATTEMPT ANY TWO):-
  - National Nutritional Policy. a)
  - Feeding problems of the children (Preschool and school going) b)
  - Methods of Nutritional Assessment c)
  - Preservation and storage of food d)

### Q.3. DEFINITIONS:-

- Pasteurization a)
- Obesity b)

## Q.4. DIFFERENTIATE BETWEEN:-

- BMI and BMR a)
- MUFA and PUFA b)

## **PROBLEM BASED QUESTIONS:-**

- Q.5. A 26 year old female client comes to the Medical OPD complaining difficulty in passage of stool since 3 days. The client reports that she face irregular, infrequent and difficult passage of feces. 3 Identify the above case. a)
  - What dietary management should be recommended for the patient? b)

## PART-B(OBJECTIVE TYPE QUESTIONS)

### (1X5=: SINGLE RESPONSE QUESTIONS:-Q.6. Which one of the following would give the highest energy per gram?:c) Protein d) Fats b) Glucose a) Sucrose Q.7. The acid commonly present in lemon is...... d) Tartaric acid c) Lactic acid **b)** Citric acid a) Ascorbic acid Q.8. The vitamin that facilitates the absorption of iron from vegetable foods is.....:c) Vitamin C d) Vitamin K b) Vitamin B a) Vitamin $\Lambda$

## BASIC B.Sc.(NURSING) - 1<sup>st</sup> SEMESTER EXAMINATION; JANUARY - 2018 (SUB:- NURSING FOUNDATION; PAPER CODE:-4100103)

### TIME: 03:00 Hrs. Max Marks:75 Instructions:-1. Write your Roll No. on the Question Paper. 2. Candidates should ensure that they have been provided with correct question paper. Complaints in this regard, if any should be made within 15 minutes of the commencement of the exam. No complaint(s) will be entertained thereafter. 3. Each Part is compulsory. Marks are indicated against each question. 4. Draw the diagram wherever required. **PART-A (DESCRIPTIVE TYPE) ESSAY TYPE QUESTIONS:-**Q.1. Define Oral hygiene. List the purpose of Giving Oral hygiene and what types of clients require special mouth care during illness. (10)Q.2. Write a short note on Any Three of the following:-(5x3=15)Comfort devices a) b) Dyspnoea Sterilization c) d) Uses of Records e) Care of linen in Hospital Care of Rubber gloves f) Q.3. Definitions/Concepts (Attempt Any Five):-(5x2=10)Communication a) b) Nursing c) Decubitus ulcer d) Purpose of Physical Examination e) Nursing process f) Assessment g) Spiritual health Q.4. Discriminatory/Differentiation Questions (Attempt Any Three):-(3x2=6)Admission Note and Discharge Note a) b) Open Bed & Operation Bed c) Inspection & Palpation d) Crisis & Lysis e) Conduction & Convection f) **Inspiration & Expiration**

### Q.5. Problem Based Questions (Attempt Any Two):-

a) Ram had oral surgery following a motor vehicle accident. The Nurse assessing the client finds the skin flushed & Warm, which of the following would be the best method to take the client's body temperature & Why?

Axillary / Oral / Arterial line / Rectal.

b) A patient who is unconscious, needs frequent mouth care when performing a mouth care, Suggest the best position of a client among written below & recommended the reason why? Side lying / Fowler's position / Supine / Trendelenburg

a) True b) False

Q.15. Glycerin acts as an anti-septic:-

a) True b) False

### **ASSERTION / REASONING:-**

Q.16. Assertion: A patient having convulsion should be given bed railing:

- Reason: To prevent from falling down.
- a) Both assertion & reason are correct
- b) Assertion is correct and reason is wrong
- c) Assertion is wrong and reason is right
- d) Both assertion and reason are wrong
- Q.17. Assertion: Fowler position in dyspnea should be given:
  - Reason: To relieve the headache.
  - a) Both assertion & reason are correct
  - b) Assertion is correct and reason is wrong
  - c) Assertion is wrong and reason is right
  - d) Both assertion and reason are wrong

Q.18. Assertion: Document the date and time of each recording of patient's condition:

Reason: It's important due to legal reasons but also for the client safety & future reference.

- a) Both assertion & reason are correct
- b) Assertion is correct and reason is wrong
- c) Assertion is wrong and reason is right
- d) Both assertion and reason are wrong

Q.19. Assertion: Correct reading of blood pressure can be taken post exercise:

Reason: Because muscular exercising will raise the blood pressure.

- a) Both assertion & reason are correct
- b) Assertion is correct and reason is wrong
- c) Assertion is wrong and reason is right
- d) Both assertion and reason are wrong

Q.20. Assertion: While bed making, don't place soiled linen on the floor:

Reason: As to avoid transmitting infections.

- a) Both assertion & reason are correct
- b) Assertion is correct and reason is wrong
- c) Assertion is wrong and reason is right
- d) Both assertion and reason are wrong

### **TEXT NUMERICAL QUESTIONS:-**

Q.21. Subnormal temperature of the body is.....

- a) 98 to 100 degree F b) 95 to 97 degree F
- **c)** 35 to 36 degree F **d)** 92 to 95 degree F

	31)	RQPS	1)	J QUIN	Ľ	· · · · · · · · · · · · · · · · · · ·			

(212=4)

.

·

Q.13. Then:-

- P: it struck me
- Q: of course

R: suitable it was

S: how eminently

The Proper sequence should be:-

a) SPQR b) QSRP

c) PSRQ

d) QPSR

Q.14. Problem Based Questions:-

"Prevention is better than cure" and it is recognized that the only way to get rid of malaria completely is to get rid of the mosquitoes which cause it. Malaria is always associated with damp and marshy land. This is not because the land is damp; but because the standing water is the breeding place of the mosquito, which begins as a larvae living in the water. Malaria does not frequently occur in dry desert countries because mosquitoes can not breed there. The only way to destroy mosquito is to prevent their breeding in standing water. This can be done by draining all ponds and pools; and by keeping them covered in the breeding season with a film of kerosene oil, which by keeping depriving the larvae of air, kills them.

- a) How can malaria be checked?
- b) In what places does malaria occur most?
- c) How can we check breeding of mosquitoes?
- d) How can we check air reaching larvae?
- e) Suggest a suitable title of the passage.

Q.15. Write a paragraph on 'Women Empowerment'.
